SUSTAINABILITY IN SPORT

Sustainability Education for the Sporting Sector

Tailored sustainability training focused on the sports sector.

Sport has a unique ability to bring communities together, inspire change and influence behaviour at scale. Our sports-specific training helps clubs, community groups and professional organisations understand their climate impacts, strengthen leadership capability and take meaningful, practical action on and off the field.

As a part of Brisbane Sustainability Agency's, Sustainable Action Training Program, our Sustainability in Sport training opportunities are designed to help individuals and organisations understand the challenges that climate change presents in the sector and how to take meaningful action.

Climate change is already affecting sport through extreme heat, severe weather, disrupted seasons and increasing pressure on facilities, events and operations. At the same time, athletes, clubs, venues and sporting organisations are uniquely positioned to influence behaviours, inspire communities and drive positive change.

Our training transforms complex concepts into practical, engaging learning experiences. Through interactive activities, discussion and real-world examples, participants build the knowledge, confidence and capability to contribute to a more sustainable future, whether at their club, organisation, workplace or within the broader community.

Interactive Workshop: Game On For Sustainability

2-hour

In-person or online

Contact us for a quote based on participant numbers

Game On for Sustainability is a highly interactive workshop that uses sport as a lens to explore sustainability, climate change and positive action. Through hands-on activities, discussion and creative thinking, participants build a deeper understanding of the sporting ecosystem, explore the connections between sport and climate, and uncover the unique opportunity sport has to inspire and accelerate positive change.

Why choose our presentations

Highly interactive & hands-on
Creative activities, group discussion and collaborative learning.

Science-based & practical
Evidence-informed content focused on real-world sustainability challenges and solutions.

Positive & solutions-focused
Explore practical actions that individuals, organisations and communities can take to drive change.

Further resources & support
Participants receive resources to support continued learning and action beyond the workshop.

Experienced facilitators
Delivered by trained facilitators in a relaxed, engaging and supportive environment.

Inspiring & empowering
Discover how sport's enormous reach, influence and community connections can help create a more sustainable future.

Who is it for?

Perfect for sporting organisations, athletes, volunteers, partners, fans and community members seeking to understand how sport can help shape a more sustainable future.

The session

Participants begin by mapping the sporting ecosystem, identifying the people, organisations and activities that shape sport and its impact.

Through a collaborative collage activity, participants explore the climate system and discover the connections between sport, communities and climate, bringing complex sustainability challenges to life in an engaging and accessible way.

The workshop then shifts to solutions, exploring practical actions that can drive positive change. Participants leave with a deeper understanding of sustainability in sport, a sense of optimism about what's possible, and practical ideas for creating impact both on and off the field.

Certified Training: Carbon Literacy for Sport

8-hour | In-person or online | $349 per person

Brisbane Sustainability Agency's Sports Carbon Literacy Training is an engaging and accredited learning experience. Developed in partnership with Let Me Be Frank and Green Planet Sport, it is Australia's first Carbon Literacy course tailored specifically to the Australian sports sector.

Participants gain a clear understanding of sport's role in climate change, while building the confidence, knowledge and motivation to reduce emissions and strengthen climate resilience across clubs, venues, events and organisations.

Gain internationally recognised certification
Upon completing the course and a short assessment, participants are awarded an internationally recognised Carbon Literacy certification. Organisations may also apply to become a Carbon Literate Organisation, demonstrating sector-leading sustainability leadership and a commitment to meaningful climate action.

Participants will gain the knowledge and confidence to:

- Understand the science of climate change and how climate change affects communities, Australia and the sporting sector
- Explore sport's climate impacts and the role sport can play in supporting climate action
- Create an action plan to reduce their own or their organisation's carbon footprint
- Build confidence communicating about climate change and gain international Carbon Literacy certification

Who's it for?
Ideal for community and professional sporting organisations, clubs, leagues, venues and event organisers, as well as professionals working in industries connected to sport, including hospitality, tourism, manufacturing, local government and education.

The course is also valuable for sport fans and anyone seeking a more engaging introduction to sustainability through the powerful and relatable lens of sport.
